## Dear Recruiting Manager

I am writing to apply for front-end engineer at Airbnb, China. I learned about this awesome opportunity from **Angela Zhu**'s Wechat blog. I believe my technical background makes me an outstanding fit for this front-end engineer position. With my knowledge and experience in web development, I can help Airbnb be more localized and popular in the China market.

I have been working as a front-end engineer in **Alibaba Inc.** for 2 years, during which I lead the refactoring of front-end infrastructure and take an active part in the restfulization of Node.js API. I love functional programming for its brevity and praise high for the efficiency of development with React.

Apart from the engineering side, as a regular traveller myself, I share the same values as Airbnb's passion, mission and vision in making travellers feel at home in foreign land.

Thank you for taking the time to consider my application and I look forward to hearing from you.

Sincerely yours,

Chuanzong Liu
