Dear Recruiting Manager

I am writing to apply for front-end engineer at Airbnb, China. I learned about it through Angela Zhu's Wechat blog. This position can utilize my skills and knowledge fully in the field of web development and my work experience in the Chinese company can make Airbnb applications more local and popular in China.

I got Master's degree in information engineer from BUPT (Beijing University of Posts and Telecommunications), and have 1.5 years of front-end and 0.5 year of back-end experience in Alibaba Inc., during which I lead the refactoring of front-end infrastructure and take an active part in the restfulization of Node.js API. I love functional programming for its brevity and praise high for the efficiency of development with React.js. I believe my web development experiences make me an outstanding candidate for the position.

I am eager to join you, because of your passion, mission and vision in making travellers feel at home in foreign land.

Thank you for taking the time to consider my application and I look forward to hearing from you.

Sincerely yours,

Chuanzong Liu
